STRICTLY CONFIDENTIAL • NON-DISCLOSURE COVENANT: This technical architecture, workflow blueprint, and administrative manual is the proprietary work product of **Suyash Shinde**, formulated exclusively for the internal evaluation and operations of **Dalal Machine Tools Agency Pvt. Ltd.** This document is strictly non-transferable and **CANNOT BE SHARED, FORWARDED, DISTRIBUTED, REPRODUCED, OR DISCLOSED** to any third-party agency, software vendor, contractor, or competitor without prior written authorization under the Indian Copyright Act, 1957.

1.0 Executive Blueprint & Architectural Ecosystem

Ye comprehensive technical manual **Dalal Machine Tools Agency Pvt. Ltd.** ke pure digital web ecosystem ka authoritative operational guide hai. Isme public website ke pure 24 pages, har ek page ke sections aur unka functional purpose, Operations Staff Admin Portal ke tools, Master Super-Admin Governance Console ke security systems, aur charo core user flows ko detail me explain kiya gaya hai.

Core Business Purpose & Technical Capabilities

Dalal Machine Tools 20+ years se European & Japanese heavy forging presses, mechanical stamping presses, aur plate bending machinery ka stocking dealer hai jiska central stockyard Chakan, Pune (50,000 sq. ft.) me situated hai. Ye web platform heavy machinery ke high-intent corporate manufacturing buyers (Tier 1 & Tier 2 auto components, forge shops, defense) ko target karta hai.

1. High-Performance Web
Sub-10ms RAM cache, 100% mobile-responsive, dynamic 83-URL XML sitemaps.

2. Conversion & RFQ Tools
High Seas Sales calculator, 1-click PDF spec sheet download, instant WhatsApp RFQ routing.

3. Generative AI Search (GEO)
Live /llms.txt and /llms-full.txt feeds for Perplexity, ChatGPT, Claude & Google AI.

1.1 Architectural Ecosystem & Component Breakdown

Dalal Machine Tools ka technical platform 3 distinct tiers me bifurcated hai:

Layer Name	Direct URL Route & Access	Primary Target Users & Practical Purpose
Public Web Suite 24 CLEAN PAGES	`/`, `/category.html`, `/pricing.html` etc. (Open to Public)	**Buyers, OEM Consultants & Plant Heads:** Machinery inventory discovery, technical spec analysis, landed cost calculation, and quotation generation.
Operations Staff Admin INVENTORY & RFQ HUB	`/admin/dashboard.html` (Cookie & Gateway Authenticated)	**Dalal Yard & Sales Team:** Machinery inventory catalog management (up to 60 units), 10-parameter spec entry, photo uploads, buyer lead triage.
Super-Admin Hub EXECUTIVE CONTROL	`/superadmin/dashboard.html` (HMAC Key & Cloaked 404 Guard)	**Directors & Lead Developer:** System security audit ledger, team accounts, rate-limiting control, 1-click offline database JSON snapshots.

1.2 Standard 10-Parameter Engineering Machinery Grid

Har machine detail page aur admin entry form par standardized 10 engineering parameters implement kiye gaye hain:

- **1. Machine Model & Make:** Manufacturer, origin (Germany/Japan/Russia), year.
- **2. Rated Tonnage Capacity:** Metric Tons pressing force (e.g. 400T, 1600T, 4000T).
- **3. Stroke Length & Adjustment:** Slide travel distance (mm) & motorized adjust.
- **4. Continuous Speed (SPM):** Strokes per minute under continuous/single cycling.
- **5. Bed & Bolster Dimensions:** Left-to-Right × Front-to-Back platen area.
- **6. Die Shut Height (SDAU):** Bed-to-slide distance for tooling fitment verification.
- **7. Clutch & Brake Mechanism:** Pneumatic friction/hydraulic unit (OMPI compatible).
- **8. Main Drive Motor Power:** Motor power rating in kW / HP and flywheel RPM.
- **9. Gross Physical Weight:** Total assembled weight in Metric Tons (approx. MT).
- **10. Physical Yard Location:** Chakan Central Yard (Pune) / European Stock.

2.0 Public Web Architecture: Routes 01 to 06

Public portal me zero placeholder pages hain. Har ek page ka specific commercial objective aur defined sections hain jo industrial buyers ko fast decision-making me help karte hain:

Route 01: Homepage (`index.html`)

PRIMARY CONVERSION ENGINE

Target & Purpose: First-time buyers, plant managers aur procurement directors ko attract karna, trust establish karna aur direct inventory search provide karna.

Key Sections Inside:

- **Hero Slider & Tonnage Search:** 400T–4000T tonnage selector with instant catalog filter trigger.
- **4 Value Pillars:** 50,000 sq. ft. Chakan yard, power trials, European sourcing, High Seas savings.
- **Featured Machinery Spotlight:** High-ticket ready-stock heavy presses with live pricing indicators.

Functional Purpose (Kaam):

- **High Seas Sales Promo Banner:** Explains 15–20% customs/landed duty savings on port delivery.
- **OMPI Co-Brand Section:** Showcases authorized Italian pneumatic clutch upgrades & retrofits.
- **Lead Capture Callout:** Direct WhatsApp quick inquiry trigger to Dalal sales desk.

Route 02: About Company (`about.html`)

CORPORATE CREDIBILITY

Target & Purpose: Corporate procurement committees aur bank valuation teams ko company ki 20+ saal ki heritage aur leadership proof dena.

Key Sections:

- **Founding Pedigree & Vision:** 20+ years of metal-forming machinery leadership under Mr. Vinit Dalal.
- **Global Sourcing Network:** Direct relationships with European & Japanese heavy stamping plants.

Functional Purpose (Kaam):

- **Stockyard Infrastructure:** 50T overhead crane capacity and electrical substation proof.
- **Client Credential Logos:** Top automotive forging suppliers and forging consortium badges.

Route 03: Import Services (`services.html`)

IMPORT LOGISTICS

Sections: 6 Pillars of heavy machinery imports: CIF shipping, heavy break-bulk rigging, customs classification, port clearing at Nhava Sheva, and plant foundation erection.

Kaam: Buyer ko assurance dena ki machine import se lekar factory foundation par erect hone tak single-point responsibility Dalal ki hai.

Route 04: Machinery Catalog (`category.html`)

LIVE STOCK DIRECTORY

Sections: 26-Category facet directory, live keyword search, tonnage slider (50T to 4000T), manufacturer filters, and yard availability toggles (In Stock / In Transit).

Kaam: Real-time searchable machinery directory. Buyer instantly filter karke exact machine profile find karta hai.

Route 05: Product Detail (`product.html`)

CORE CONVERSION PAGE

Sections: Lightbox photo gallery, 10-parameter technical spec matrix, foundation drawings, 1-Click PDF spec generator, and WhatsApp RFQ trigger with pre-filled machine details.

Kaam: Har machine ka individual deep-dive page jo directly buyer ka RFQ generate karta hai.

Route 06: Brand New Units (`brand-new-machinery.html`)

OMPI CO-BRANDING

Sections: OMPI Italy authorized pneumatic friction clutches, hydraulic press brakes, dual safety valves, and press modernization retrofit capabilities.

Kaam: Used machinery buyers ko Italian OEM safety & clutch upgrades cross-sell karna.

2.1 Public Web Architecture: Routes 07 to 15

Trust verification, High Seas customs duty calculators, and technical machinery inspection case studies:

Page & Route	Key Sections Inside	Functional Purpose (Kaam)
Route 07: Shipment Archive `gallery.html`	High-res photo journal of heavy machines being loaded at European ports, container de-stuffing at Mumbai port, and installation at Chakan yard.	High-ticket industrial buyers ko visual proof dena ki Dalal genuine heavy rigging imports perform karta hai.
Route 08: Contact Center `contact.html`	Mumbai Tardeo HQ address, Chakan Pune stockyard location with embedded Google Map, official contact numbers, and general RFQ submission form.	In-person stockyard visits schedule karna aur corporate correspondence route karna.
Route 09: Express RFQ `contact-2.html`	Short-form capacity selector, machine category dropdown, contact information, urgency level toggle.	Fast lead capture for buyers on mobile who do not want to fill long forms.
Route 10: Industrial FAQs `faqs.html`	High Seas Sales procedure, customs duty payment, under-power trials, warranty terms, transport logistics.	Eliminates buyer friction and educates plant managers on import regulations (Structured FAQ Schema for Google AEO).
Route 11: Endorsements `testimonial.html`	Client testimonials, automotive supplier case citations, repeat buyer statistics, customer satisfaction audit.	Provides social proof and corporate validation from established auto forging companies.
Route 12: High Seas Tariffs `pricing.html`	Interactive High Seas Sales duty calculator, customs duty vs IGST input tax credit advisory, freight formula.	Enables buyers to compute exact landed cost savings (15% to 20%) before purchasing stock.
Route 13: Industry Journal `blog.html`	Articles on forging technology, European machine maintenance, friction clutch retrofits, market trends.	Content hub driving organic SEO keywords and establishing technical domain authority.
Route 14: Lead Visual Article `blog-large-image.html`	High-impact visual layout with embedded technical machinery photographs, foundation drawings, and CTA.	Long-form deep dive for high-value machine spotlights (e.g. 4000T Voronezh or Schuler press lines).
Route 15: Case Study View `blog-single.html`	Detailed inspection case study showing how overseas machines are tested under power prior to shipment.	Builds buyer confidence in Dalal's European quality inspection and certification protocol.

2.2 Public Web Architecture: Routes 16 to 24

Turnkey plant installation showcases, aftermarket spares catalog, package RFQ cart, and compliance pages:

Page & Route	Key Sections Inside	Functional Purpose (Kaam)
Route 16: Projects Overview `projects.html`	Portfolio of completed heavy machinery installations (1600T to 4000T lines) across auto clusters in India.	Demonstrates technical installation and heavy rigging execution capabilities.
Route 17: Heavy Rigging `projects-modern.html`	Photo-rich showcase of 80+ ton single-piece castings, heavy hydraulic jacking, and pit foundations.	Visual evidence of handling extreme heavy machinery logistics without third-party dependence.
Route 18: Sector-Wise Plants `projects-with-filter.html`	Faceted filter for projects: Forging Presses, Stamping Lines, Plate Bending Rolls, Defense Machinery.	Allows buyers to filter past plant setups matching their exact industrial manufacturing sector.
Route 19: Turnkey Plant Case `projects-single.html`	End-to-end case narrative of a complete 2500T press line: selection in Germany → shipping → erection in Pune.	Comprehensive breakdown of turnkey plant engineering from concept to production trial run.
Route 20: Tooling & Spares `shop.html`	Catalog of ready-stock press spares: die blocks, bolster plates, OMPI clutch linings, hydraulic seals.	Generates repeat aftermarket revenue from existing machine operators and press shops.
Route 21: Spares Detail `shop-single.html`	Granular technical drawing, dimensions, OEM part compatibility, wear tolerances, and instant quote CTA.	Technical specification view for maintenance engineers looking for immediate replacement parts.
Route 22: RFQ Package Cart `shoping-cart.html`	Multi-item consolidation cart where buyers can bundle multiple machines, spares, and accessories.	Allows buyers to assemble a multi-million-rupee package inquiry in a single quotation request.
Route 23: Structured RFQ `checkout.html`	Corporate details form (Company, GSTIN, Plant Location, Delivery Timeline) submitting the consolidated RFQ.	Dispatches validated lead details into the Admin CRM and sends confirmation to the buyer.
Route 24: Error Recovery `404.html`	Custom branded error page featuring a search box and 6 core machinery category shortcuts.	Prevents bounce rate; guides lost visitors back to active machinery stock listings.

3.0 Staff Operations Admin Portal Features & Tools

Staff Admin Portal Dalal ke yard managers aur sales staff ka daily control hub hai. Iska primary objective machinery inventory ko instantly update karna aur customer inquiries ko triage karke quotations bhejna hai:

1. Operations KPI Dashboard (`dashboard.html`)

DAILY OVERVIEW

- **Live Inventory Counter:** Total heavy machines active in catalog (synced with public website).
- **Unread RFQ Alert Badge:** Highlights pending customer inquiries requiring sales action.
- **Recent Leads Table:** Quick-view table showing latest inquiries with phone, email, and machine model.
- **1-Click Quick Actions:** "Add New Machine", "Open Customer RFQs", "View Live Website".

Kaam: Staff ko subah aate hi pata chal jata hai ki kitne naye leads aaye hain aur kaun si machines update karni hain.

2. Machinery Catalog Hub (`products.html`)

STOCK CONTROL

- **Complete Inventory Table:** Searchable & filterable list of all machines up to 60 units.
- **Status Toggles:** 1-Click toggle between "Active (Public)", "Sold / Reserved", or "Draft".
- **Fast Edit & Delete:** Direct buttons to modify pricing, specifications, or remove old stock.
- **Instant Search & Category Filter:** Find machines by tonnage, brand (Voronezh, Schuler), or category.

Kaam: Jab yard me machine sell ho jati hai ya nayi aati hai, staff 5 second me status change kar sakta hai.

3. 10-Parameter Machine Editor (`product-form.html`)

SPEC BUILDER

- **10 Engineering Parameter Fields:** Tonnage, Stroke, Speed (SPM), Bed size, Shut Height, Clutch type, Motor kW, Weight, Yard Location.
- **Photo Gallery Uploader:** Upload multiple high-res photographs with automatic thumbnail creation.
- **PDF Drawing Attachment:** Upload foundation plans and technical dimension sheets.
- **SEO Meta Tag Builder:** Auto-generates clean URL slugs, meta titles, and OpenGraph preview.

Kaam: Nayi machine ka professional listing create karna jo automatically sitemap aur AI feed me add ho jati hai.

4. Customer RFQ Lead Tracker (`inquiries.html`)

SALES CRM

- **Lead Status Lifecycle:** Mark status as "New Lead → Contacted → Quote Sent → Inspection Booked → Won/Lost".
- **WhatsApp Direct Trigger:** 1-Click to open buyer WhatsApp with customized machine quotation message.
- **CSV Export Engine:** 1-Click download of all leads in RFC-4180 Excel CSV format with UTF-8 BOM.
- **Customer Notes Ledger:** Add internal sales notes (e.g. "Client visited Chakan yard; offered 15L").

Kaam: Website se aaye huye kisi bhi lead ka follow-up miss na ho aur sales pipeline track hoti rahe.

5. Automated 1-Click PDF Spec Sheet & Quotation Generator

SALES ACCELERATION TOOL

Function & Practical Use: Staff ya buyer jab kisi bhi machine page par "Download PDF Spec Sheet" ya admin me "Generate Quotation" par click karta hai, system sub-second me ek high-definition, A4 print-ready PDF generate karta hai. Isme Dalal ka branded corporate header, machine ki 10 technical specifications, yard testing guarantee, foundation drawing links, aur sales contact details perfectly formatted hoti hain.

Kaam: Sales team ko manually Word ya Excel me quotation banane ki zaroorat nahi padti; buyer ko instantly professional PDF mil jata hai.

4.0 Master Super-Admin Governance Console

Super-Admin Console company ke Managing Director aur Principal Software Engineer ka isolated, high-security governance console hai. Ye portal ordinary internet users ya staff ke liye completely invisible (cloaked 404) rehta hai:

SecOps Architecture & Multi-Layer Intrusion Defense

Koi bhi scanner ya unauthorized user agar `/superadmin` ya `/admin` access karne ki koshish karega, system standard login page dikhane ke bajaye **404 Not Found** return karta hai. Authorized access ke liye:

1. Cloaked Gateway Key
Requires pre-configured HMAC gateway key to unlock login route.

2. Honeypot Traps
Fake paths (/wp-admin) catch malicious bot scans and log IP.

3. Signed Session Cookies
HTTP-only, SameSite strict session tokens prevent CSRF/XSS.

4.1 Super-Admin Functional Modules

1. Executive Telemetry (`dashboard.html`) — TELEMETRY

- **Real-time Uptime Monitor:** Node.js server status, memory footprint, active HTTP connections.
- **Total Audited Machinery Count:** Verification that catalog matches physical yard audit.
- **Aggregated RFQ Lead Volume:** Total inquiry tally with conversion win/loss percentages.
- **Live System Health Alert:** Visual green badge confirming sub-10ms micro-cache status.

Kaam: Director ko ek single screen par company ke technical aur commercial traffic ki health dikhana.

2. Staff Accounts & RBAC (`users.html`) — ACCESS CONTROL

- **User Account Creation:** Create staff accounts with distinct usernames and email IDs.
- **Role Segregation (RBAC):** Assign "Operations Staff", "Sales Agent", or "Super Admin" permissions.
- **Instant Lockout Override:** 1-Click disable toggle to instantly revoke staff access if someone leaves.
- **Password Reset Engine:** Secure password hash generation using Bcrypt with 10 salt rounds.

Kaam: Staff permissions control karna taaki unauthorized staff critical database delete na kar sake.

3. Security Audit Ledger (`logs.html`) — COMPLIANCE

- **Immutable Action Logging:** Every product add, price change, lead deletion is logged with timestamp, user ID, and IP address.
- **Intrusion Attempt Alerts:** Failed password attempts, honeypot hits, rate-limit triggers.
- **Exportable Security Trail:** Download security logs for IT audit and compliance.

Kaam: Complete transparency; agar koi machine galti se delete ho, toh pata chalta hai kisne kiya.

4. Database Backup & Restore (`settings.html`) — DISASTER RECOVERY

- **1-Click JSON Database Export:** Downloads entire system database (products, specs, leads, users) in one click.
- **Database Restore Engine:** Upload JSON backup to restore entire catalog in case of server failure.
- **Cache & Sitemap Rebuild:** 1-Click button to force-refresh dynamic 83-URL XML sitemaps and /llms.txt.

Kaam: 100% data safety; server crash hone par 60 seconds me pura business restore ho jata hai.

5.0 End-to-End User Journeys & Action Flows

Ye section describe karta hai ki alag-alag personas (Customer Buyer, Yard Staff, Sales Exec, Super-Admin) system ke sath step-by-step kaise interact karte hain:

Flow A: Heavy Machinery Buyer Procurement Journey

Scenario: Auto component plant head Pune me 1600T Mechanical Forging Press search kar raha hai:

1. **Discovery via Google Search, AI Search or Direct Referral**
   Buyer search karta hai *"used 1600 ton forging press Pune stock"*. Dalal website Google Search me rank hoti hai aur Perplexity/Claude AI Overview me directly cited source ban kar aati hai.

2. **Landing & Interactive Capacity Filtering**
   Buyer homepage (`index.html`) ya catalog (`category.html`) par land karta hai. Tonnage slider ko 1600T par filter karta hai aur "Mechanical Forging Press" select karta hai. Live results instantly update hote hain (sub-10ms response).

3. **Deep Technical Evaluation & Landed Cost Calculation**
   Buyer machine detail page (`product.html`) open karta hai. 10-Parameter engineering grid (stroke, shut height, bolster size) inspect karta hai. High Seas Sales calculator (`pricing.html`) me check karta hai ki direct port delivery se kitni duty bachegi.

4. **1-Click PDF Spec Sheet & Official WhatsApp RFQ**
   Buyer *"Download Official PDF Spec Sheet"* par click karke internal management committee ke liye print leta hai. Fir *"Inquire via WhatsApp"* par click karta hai → System pre-filled machine code ke sath Dalal sales desk ko WhatsApp message send kar deta hai.

Flow B: Stockyard Operations Staff Inventory Onboarding Flow

Scenario: Chakan stockyard me Europe se 2500T Voronezh Press physically arrive hui hai:

1. **Staff Authentication via Operations Portal**
   Yard manager browser me `/admin` access karta hai, signed gateway cookie verify hoti hai, aur staff dashboard open hota hai.

2. **Opening Machine Onboarding Form**
   Staff sidebar se *"Add New Machine"* (`product-form.html`) select karta hai. Machine Title, Brand Name (Voronezh), Model Designation, aur Year of Mfg enter karta hai.

3. **Entering Standard 10-Parameter Engineering Grid**
   Tonnage (2500T), Stroke Length (400 mm), SPM (20), Bed Dimensions (1600 x 1400 mm), Shut Height (950 mm), Clutch Type (OMPI Pneumatic Friction), Motor Power (132 kW), Weight (160 MT), aur Yard Location (Chakan Central Bay) fill karta hai.

4. **Uploading High-Res Photographs & Publishing**
   Staff mobile ya PC se machine ke 6 clear photos upload karta hai aur "Active (Public)" toggle select karke *"Save & Publish Machine"* par click karta hai. Machine instantly live catalog, sitemap, aur AI search feed me publish ho jati hai.

5.1 Sales Triage & Executive Governance Flows

Daily sales lead processing aur executive disaster recovery backups ka operational standard:

Flow C: Sales Executive Lead Triage & WhatsApp Quotation Flow

Scenario: Website se buyer ne 1000T Hydraulic Press ke liye quote request submit kiya hai:

1. **Lead Ingestion & Instant Notification**
   Buyer ke submit karte hi lead admin database (`inquiries.html`) me store ho jata hai aur Dalal sales desk phone par notification trigger hota hai.

2. **Lead Review & Machine Verification**
   Sales executive `inquiries.html` open karta hai. Buyer ki company, phone number, machine requirement, aur budget review karta hai.

3. **1-Click WhatsApp Follow-Up & Quotation Dispatch**
   Executive *"Chat on WhatsApp"* button par click karta hai. System pre-formatted text load karta hai: *"Dear Sir, Thank you for inquiring about 1000T Hydraulic Press at Dalal Machine Tools. Attached is the technical specification sheet..."*. Executive machine PDF attach karke send kar deta hai.

4. **Status Updating & Trial Run Scheduling**
   Executive status ko *"New"* se change karke *"Inspection Booked"* karta hai aur internal note daalta hai: *"Buyer visiting Chakan Yard on Friday for live power trial"*.

Flow D: Master Executive Governance & Database Backup Flow

Scenario: Weekly routine maintenance aur disaster recovery backup execution:

1. **Cloaked Gateway Login by Director**
   Authorized executive security pass URL ke through master console (`/superadmin/dashboard.html`) me authenticate karta hai.

2. **Reviewing System Telemetry & Intrusion Logs**
   Executive `logs.html` me check karta hai ki koi suspicious login failure ya bot scraping attempt toh nahi hui. Sabhi normal staff actions audit ledger me verified hote hain.

3. **Executing 1-Click Database JSON Backup**
   Executive `settings.html` open karke *"Download Full Database JSON Snapshot"* par click karta hai. Ek immutable JSON file download ho jati hai jisme company ka pura catalog, specs, leads, aur configurations hoti hain.

4. **Secure Archiving on External Local Drive**
   Executive backup file ko local external drive / secure offline storage me save karta hai. Zero dependency on third-party cloud hosting.

6.0 Operational Protocols, SLAs & Sign-Off

Web platform aur admin suites ko live run karne ke liye standard operational boundaries aur responsibilities:

Catalog Onboarding Responsibility Boundary

Consultant upfront **up to 60 heavy machines** ka complete catalog data, 10-parameter specifications, aur photos upload karke go-live verified karega (Client standardized Excel/CSV template me photos aur specs provide karega).

60 machines ke baad daily routine listings Dalal ki internal staff admin portal (`product-form.html`) ke through upload karegi.

Production Hosting & Infrastructure SLA

Public web application high-speed Node.js runtime par sub-10ms micro-caching ke sath deployed hai. Domain name (dalalmachines.com) aur production server accounts Dalal Machine Tools ke direct corporate ownership me hain.

Zero third-party proprietary lock-in. 100% source code aur administrative ownership payment settlement par transfer hoti hai.

6.1 Staff Training & Operational Handoff Protocol

Go-live ke dauran Dalal team ko formal training provide ki jayegi:

1. Live Interactive Training
Hands-on training session for Dalal yard & sales staff on machine creation, photo upload, and RFQ triage.

2. High-Def Video Library
Step-by-step screen recorded video tutorials covering every feature for future new staff onboarding.

3. Printed Standard SOP
Physical reference booklet for Chakan yard desk with 10-parameter data entry rules.

6.2 Formal Functional Verification & Sign-Off

By signing below, the Client confirms that this functional specification accurately represents the agreed deliverables for the Dalal Machine Tools Web Platform & Operations Suite:

For: Dalal Machine Tools Agency Pvt. Ltd.
CIN: U29299MH1985PTC035440 • GSTIN: 27AAACD1234F1Z5
