DALAL MACHINE TOOLS AGENCY & OMPI INDIA

STRATEGIC MEETING AGENDA & EXECUTIVE FRAMING

Doc Ref: PLAYBOOK-2026-DISCOVERY
Meeting Target: Mr. Vinit Dalal, MD
Architect: Suyash Shinde (+91 96070 28594)

TARGET CLIENT STAKEHOLDERS

Mr. Vinit Dalal, Managing Director
Dalal Machine Tools Agency Pvt. Ltd. (Mumbai • Pune)
OMPI India LLP (Technical Alliance with OMPI S.r.l., Italy)

LEAD TECHNICAL CONSULTANT

Suyash Shinde, Principal Systems Architect
Phone: +91 96070 28594 • **Email:** suyashshinde360@gmail.com
Scope: Dual-Platform Architecture (24 Routes + 33 Modules)

MEETING STRATEGY & TIME ALLOCATION FLOW (45–60 MINUTES)

Phase 1: 00–10 Mins
Strategic Framing: Introduce dual-engine concept (Public Ingestion vs. Internal ERP Ops); set discovery goals.

Phase 2: 10–25 Mins
Dalal Web Engine: Walk through 24 routes, physical yard trust, 2×2 spec grid, and direct WhatsApp RFQ routing.

Phase 3: 25–45 Mins
OMPI ERP & Landed Cost: Deep-dive on EUR customs calculation, 60s quotes, BOM, and warehouse bin tracking.

Phase 4: 45–60 Mins
Phasing & Sign-Off: Align on Phase 1 Web launch vs. Phase 2 ERP rollout; agree on milestone schedule.

THE 5 STRATEGIC TALKING POINTS TO ESTABLISH AUTHORITY

VALUE PROPOSITION FRAMING

1. Physical Stockyard Reality vs. Synthetic Brokers

Explain that online buyers distrust generic listings. Dalal's portal proves physical ownership in Pune yard within 5 seconds via live ground indicators, dimensional crosshair grids, and verified inspection certificates.

2. High Seas CIF vs. Pune Yard Cost Modeling

Institutional buyers want financial options. Show how Route 12 transparently illustrates the 8%–15% landed cost savings on direct port shipments (Section 2(4) CST title transfer) versus local yard-delivered stock.

3. 60-Second Fast-Quote vs. 2-Day Manual Quotations

Manual quotes take 24–48 hours and risk margin errors. ERP Module 04 compiles CAD outline drawings, EUR spot rates, customs duty, and milestone payment terms into a branded proposal PDF in under 60 seconds.

4. EUR Fluctuation & Landed Duty Hedging

OMPI units imported from Italy risk margin loss under currency volatility. Landed Cost Engine (Module 13) calculates Basic Customs Duty (7.5%), SWS (10%), IGST (18%), and port clearing with dynamic exchange buffers.

5. Milestone Billing & Retention Bad-Debt Sentinel: Heavy presses and retrofits operate on staggered milestones (30% Advance, 50% Dispatch, 20% Post-Installation). ERP Module 28 blocks Rule 55 delivery challans and e-Way bills until dispatch payments are officially verified in the ledger.

CATEGORY A: DALAL MACHINERY WEB PLATFORM & INBOUND LEADS (ROUTES 01–24)

HIGH-TICKET BUYER ACQUISITION

QUESTION 01 Inbound RFQ Triage & WhatsApp Lead Routing Protocol

> "Vinit ji, abhi jab koi client 1600T ya 2500T press ke liye website par inquiry submit karta hai, toh lead flow kiske paas jana chahiye? Direct aapke personal WhatsApp par instant notify ho, ya pehle aapke sales coordinator ko filter karke formal proposal aapko review karwana chahiye?"

Architectural Intent: Determines lead notification logic for Routes 01, 05, and 08. Identifies whether to pre-fill direct WhatsApp chat to the MD or trigger an internal multi-recipient CRM webhook.

QUESTION 02 High Seas Sales (CIF) vs. Pune Yard Pricing Transparency

> "Aapke kitne percent clients direct Europe/Asia se High Seas import lena prefer karte hain versus Pune Yard ready-stock purchase? Kya hume har machine PDP par dono pricing options (Ex-Yard Pune vs High Seas CIF JNPT) publically dikhana hai ya sirf requested RFQ par reveal karna hai?"

Architectural Intent: Configures commercial visibility on Route 12 (Pricing) and Route 05 (Machine PDP). Establishes whether CIF calculations are public or behind an authenticated RFQ gate.

QUESTION 03 Pune Stockyard Physical Inspection & Power Trial Appointments

> "Pune yard me power-on machine trial lene ke liye buyer ka screening protocol kya hai? Kya visitor direct calendar slot book kar sakta hai, ya pehle company ka GSTIN aur preliminary technical requirement verify hona mandatory hai?"

Architectural Intent: Locks down form validation rules for Route 08 (Contact) and Route 09 (Express RFQ). Prevents unauthorized access or non-serious visitors from blocking inspection slots.

CATEGORY B: OMPI ITALY CLUTCHES & ENGINEERING CALCULATIONS (MODULES 01–17)

PRECISION ENGINEERING ENGINE

QUESTION 04 Clutch Sizing & Torque Calculation Inputs (GD^2 Models)

> "Jab koi customer mechanical press retrofit ke liye OMPI clutch demand karta hai, toh aapke technical engineer ko press ka flywheel inertia (GD^2), SPM aur air pressure client se mil jata hai, ya aapki team on-site physical measurement audit karti hai?"

Architectural Intent: Validates calculation inputs for ERP Module 16 (Torque & Pressure Sizing Calculator). Configures default safety derating formulas for variable factory air pressures (4.5 to 6.0 bar).

QUESTION 05 Italian Consignment Lead Times & Minimum Spares Buffer

> "OMPI Italy se PO place karne ke baad sea consignment Nhava Sheva (JNPT) pahunchne me standard kitna time lagta hai? (8 weeks ya 12 weeks?) Aur friction pads ya seal kits jaise high-wear items ka minimum safety buffer stock kitna rakhna chahiye?"

Architectural Intent: Sets automated threshold parameters for ERP Module 25 (Automated Re-Order Alert MRP) and maritime tracking schedules in Module 14 (Shipment & Bill of Lading Ledger).

CATEGORY C: WORKSHOP OPERATIONS, RECONDITIONING & SPARES (MODULES 18–25)

WAREHOUSE & QUALITY CONTROL HUB

QUESTION 06 Workshop Job Cards & Dial Gauge Runout Tolerances

> "Aapke Pune service center me jab koi clutch reconditioning ya crankshaft turning hoti hai, toh QC clearance ke liye kya runout standard follow hota hai? (<0.05mm?) Kya technician ko 100-cycle pressure hold test ki report sign karke upload karna mandatory karna hai?"

Architectural Intent: Sets digital quality checklist parameters for ERP Module 23 (Reconditioning Ledger) and Module 21 (Inward GRN Engine) to ensure full warranty compliance.

QUESTION 07 Multi-Location Stock Segmentation & Bin Tracking

> "Stock physically kitni jagah divide rehta hai? (Pune Central Warehouse, Chakan Staging Yard, ya on-site client locations?) Kya storekeeper ko bin-level tracking (Rack, Shelf, Bin) chahiye ya overall warehouse count kafi hai?"

Architectural Intent: Structures the multi-location perpetual inventory model in ERP Module 18 (Real-Time Stock Ledger & Bin Management).

CATEGORY D: FINANCIAL GOVERNANCE, MILESTONES & GST COMPLIANCE (MODULES 26–33)

LEDGER & TAX GOVERNANCE

QUESTION 08 Commercial Discount Hierarchy & Gross Margin Floors

> "Sales engineer ko quotation banate waqt kitna percent discount dene ki authority hai? Aur kya 22% ya 20% gross margin se neeche quote lock ho jana chahiye jab tak aap (MD) personally approve na karein?"

Architectural Intent: Configures permission bitmasks in ERP Module 07 (Customer Discount Matrix) and sets hard approval thresholds to prevent margin slippage.

QUESTION 09 Payment Milestone Locks on Delivery Challan & e-Way Bills

> "Machinery aur clutch dispatch ke waqt kya rule hai? (Example: 30% advance, 50% before loading/dispatch, 20% after installation). Kya ERP me rule banayein ki jab tak accounts team 50% payment received mark na kare, tab tak Rule 55 Delivery Challan aur e-Way Bill print na ho sake?"

Architectural Intent: Enforces automated dispatch blocks in ERP Module 22 (Outward Delivery Challan) and Module 28 (Accounts Receivable Sentinel) to eliminate bad debt.

QUESTION 10 Accounting Software Integration & GSTR-1 Reconciliation

> "Aapki accounts team abhi Tally, Busy ya koi aur software use karti hai GSTR-1 aur balance sheet ke liye? Kya ERP se direct one-click JSON/Excel export chahiye jise wo direct GST portal ya apne CA ko bhej sakein?"

Architectural Intent: Formats data export schemas in ERP Module 26 (GST Tax Invoice) and Module 27 (GSTR-1 Reconciliation Exporter) for accounting compatibility.

EXECUTIVE OBJECTION HANDLING MATRIX • REAL-TIME STRATEGIC RESPONSES

CONSULTING AUTHORITY

POTENTIAL CLIENT QUESTION / CONCERN	SUYASH'S STRATEGIC ARCHITECTURAL RESPONSE
"Website toh simple honi chahiye, itne 24 pages ki kya zaroorat hai?"	"Vinit ji, simple brochure websites 5-ton presses ke local broker banati hain. Dalal 2000T-4000T heavy forging presses deal karta hai jahan deal size £100k se €500k hoti hai. Institutional buyer aur bank valuers ko jab tak engineering specs, ground stock verification aur OMPI technical capabilities nahi dikhegi, wo Pune aane ka decision nahi lenge."
"ERP hum baad me sochenge, pehle sirf website live karte hain."	"Bilkul theek approach hai Vinit ji. Isliye humne pure scope ko 2 distinct phases me plan kiya hai: Phase 1 me Dalal ke 24 Web Routes live honge jo inbound RFQs layenge, aur Phase 2 me OMPI ke core modules (Costing, Invoicing, Spares) rollout honge. Aaj meeting me hum sirf architecture validate kar rahe hain taaki kal jakar rebuild na karna pade."
"Total implementation cost aur timeline kya rahegi?"	"Hamare paas complete 57 units ka modular architecture blueprint ready hai. Phase 1 (Dalal Web Platform) 3 se 4 weeks me production-ready deploy ho jayega. ERP modules sprint-wise roll out honge. Aaj ke discovery inputs ke basis par hum exact milestone commercial schedule agree kar lenge."

PRE-MEETING PREPARATION CHECKLIST (WHAT TO CARRY TOMORROW)

1. Master Specification Manual:
Carry a printed copy or iPad with **DALAL_AND_OMPI_57_PAGES_AND_MODULES_MASTER_SPECIFICATION.pdf** (32 Pages, Large Font) to show complete architectural preparedness.

2. Live Interactive Prototype:
Have **index.html** and **category.html** loaded locally on laptop browser to demonstrate 2×2 crosshair spec grids, compare selectors, and instant WhatsApp payloads.

3. Note-Taking Discipline:
Actively note specific HSN codes, average order values, and credit terms in front of the client. This reinforces your position as a seasoned Principal Architect.

4. Clear Closing Next Steps:
Conclude the meeting by agreeing to send an updated Scope of Work (SOW) and Phase 1 delivery milestone contract within 24 hours based on their answers.
